1. Introduction

1.1 Purpose

The purpose of this Software Requirements Specification (SRS) is to define the functional and non-functional requirements of the Capsule Tahawul Learning Platform. This document provides a clear understanding of the system requirements for developers, designers, testers, and stakeholders throughout the software development lifecycle.

1.2 Scope

Capsule Tahawul is a web-based learning platform that connects students, trainers, companies, and administrators. The system allows users to browse courses, enroll in training programs, manage educational content, request corporate training, and administer the platform through dedicated dashboards.

1.3 Definitions, Acronyms, and Abbreviations

SRS: Software Requirements Specification

API: Application Programming Interface

UI: User Interface

Admin: System Administrator

LMS: Learning Management System

1.4 References

- Client Meeting Notes
- Capsule Bootcamp Handbook
- IEEE Software Requirements Specification Guidelines

2. Overall description

2.1 Product perspective

Capsule Tahawul is a standalone web application designed to bridge the gap between education and industry. The platform enables students to learn new skills, trainers to publish educational content, companies to request professional training, and administrators to manage all platform activities.

2.2 Product functions

The platform provides the following core functions:

- User Registration
- User Login
- Browse Courses
- Search Courses
- Course Enrollment
- Student Dashboard
- Trainer Dashboard
- Company Dashboard
- Admin Dashboard
- Contact Support

3. Specific requirements

3.1 Functional requirements

FR-01 User Registration

The system shall allow new users to create an account.

FR-02 User Login

The system shall authenticate registered users.

FR-03 Browse Courses

Users shall browse all available courses.

FR-04 Search Courses

Users shall search courses by title or category.

FR-05 Course Enrollment

Students shall enroll in free or paid courses.

FR-06 Trainer Course Management

Trainers shall create and manage courses.

FR-07 Company Requests

Companies shall submit training and bootcamp requests.

FR-08 Admin Management

Administrators shall manage users, courses, trainers, and companies.

3.1.1 External interface Requirements

. User Interface

The system shall provide a responsive and user-friendly interface.

The interface includes:

- Home Page
- Login Page
- Register Page
- Courses Page
- Course Details
- Student Dashboard
- Trainer Dashboard
- Company Dashboard
- Admin Dashboard

Software Interface

The frontend communicates with backend services using REST APIs and JSON responses.

3.2 Non-Functional Requirements

3.2.1 Usability Requirements

- Easy navigation
- Responsive design
- Consistent interface
- Simple registration process

3.2.2 Performance Requirements

- Pages load within three seconds.
- Search results appear quickly.
- Dashboard loads efficiently.

3.2.3 Reliability Requirements

- Stable operation.
- Proper error handling.
- Reliable data storage.

3.2.4 Security Requirements

- User authentication.
- Role-based authorization.
- Secure password handling.
- Protected user data.

3.3 System Constraints

The system has the following constraints:

- Internet connection is required.
- Modern web browser is required.
- React is used for frontend development.
- GitHub is used for version control.
- Backend APIs will be integrated in later development stages.

3.4 Assumptions

The project assumes that:

- Users have internet access.
- Users provide valid information.
- Email services are available.
- Backend APIs follow the agreed API contract.

3.5 User Roles

Role	Responsibilities
Guest	Browse courses, search, register, login
Student	Enroll in courses, complete lessons, view certificates
Trainer	Create and manage courses, upload materials
Company	Submit training requests and monitor status
Administrator	Manage users, courses, trainers, companies, and reports

3.6 System Features Summary

- Authentication
- Course Management
- Dashboards
- Company Requests
- Admin Panel
- Contact Support

3.7 Conclusion

This Software Requirements Specification describes the software requirements for the Capsule Tahawul Learning Platform. It defines the core system features, user roles, functional requirements, and non-functional requirements that will guide the design, implementation, testing, and deployment of the platform.

The document serves as a reference throughout the development process and ensures that all stakeholders share a common understanding of the project's objectives and expected functionality.
